## Hoist Rentals

## Experience the Alimak Hoist Advantage

With its product the Alimak Scando 650, Alimak Hek won the IAPA Award, in the category – Product of the Year, Mast Climbing Work Platform/Hoists

Our Alimak Scando Construction Hoists ease transportation of long facade elements and other bulky materials for your team. With its large capacity and efficient speed and industry leading design, productivity will increase saving your company and project time and money.

## How We Started

Compass Equipment started 14 years ago in Kelly Hadland's backyard. Back then we only offered 1 self-erecting tower crane in the Arizona market. Fast-forward through two moves and amazing expansion to locations in California, Nevada, Texas, and Colorado. Our commitment to product innovation, equipment rentals, parts, service, and material handling are valued throughout the Southwest today.

Compass Equipment has grown a lot since we started in 2007, and we continue to focus on building relationships with our customers to be more than just an equipment rental company. We understand that in our industry issues sometimes arise, and we have a dedicated team of experienced professionals to react quickly when they do. We make that commitment to our clients as a valued partner in the industry.
